

## Crop Production Flow Diagram

Consider each stage of the production flow diagram on the left hand of the page and in the boxes in the centre of the page suggest the potential for improving the sustainability of the growing process at each stage. Once this is completed consider if the potential improvements that have been identified are likely to result in the increase or the decrease of any of the Five Capitals (natural, human, social, manufactured or financial). The structure of the crop production flow diagram is taken from the Assured Produce generic protocol, for details of the protocols please see [www.assuredproduce.co.uk](http://www.assuredproduce.co.uk)
